Intern at Static.pro (03/2025-05/2025)

TOOLS

- Uipath Studio/StudioX/web
- Salesforce Lighting App Builder
- Qlik sense
- Zapier
- Git & GitHub
- Visual Studio Code

PROFILE

UiPath Developer in the making with real-world workflow automation experience. AI-first mindset, committed to crafting smart, stable RPA solutions that improve tasks and deliver impact.

PROJECTS

Gen-AI Based Personalized Email Automation

- Developed an automation system that utilizes AI models like ChatGPT and Gemini to generate and send automated replies to emails based on their subject and content.

Automated Certificate Generator And Email Sender

- Developed an automation that generates certificates for events or competitions and sends them as PDFs to the specified email address.

Automated Email Alerts On Whatsapp

- Developed an automation that activates when a new email is received, sending the email details as an alert to the specified WhatsApp number, utilizing Zapier for this process.

Automated Voter Id based Activities on Voters portal

Developed an Automation System to Carry Out Operations Such As:

- Creating New Voter Registrations
- Removing Voter IDs Due to Death or Duplicates
- Updating Voter Details, etc.

Data Analytics Based On Insights From Aadhaar

- Developed an analytics project utilizing insights from Aadhar, resulting in a dashboard that includes the number of accepted, rejected, and applied cases in each state, among other metrics

GAN and ResNet based Combination Deep Learning Model for Recognizing Fake Faces

- Analyze the given image and gives the output as probability of being a fake face or a real one

CERTIFICATIONS

- NPTEL Certificate(IOT)
- Infosys Springboard (HTML5)
- UiPath Academy RPA Citizen
- Developer Foundation Training

ACHIEVEMENTS

- WON SECOND PRIZE IN HACK-A-BOT 2024 .
- CODERS CLUB MEMBER & CO-LEAD.
- PARTICIPATED IN SMARTINDIA-HACK-A-THON 2023.
- PARTICIPATED IN CATCH 2024 AND WENT TO THE FINALS.
