- Qlik Sense
- Zapier
- Git & GitHub
- Visual Studio Code

PROFILE

Motivated and aspiring UiPath Developer with hands-on experience in designing and automating workflows using UiPath Studio. Skilled in developing efficient automation solutions, and ensuring error-free deployment. Enthusiastic about developing Robotic Process Automation (RPA) to optimize tasks and drive innovation

PROJECTS

Voter Id based Activities on Voters portal

Developed an Automation System to Carry Out Operations Such As:

- Creating New Voter Registrations
- Removing Voter IDs Due to Death or Duplicates
- Updating Voter Details, etc.

Gen-AI Based Personalized Email Automation

- Developed an automation system that utilizes AI models like ChatGPT and Gemini to send automated replies to emails based on their subject and content.

Automated Certificate Generator And Email Sender

- Developed an automation that generates certificates for events or competitions and sends them as PDFs to the specified email address.

Email Alerts On Whatsapp

- Developed an automation that activates when a new email is received, sending the email details as an alert to the specified WhatsApp number, utilizing Zapier for this process.

Data Analytics Based On Insights From Aadhaar

- Developed an analytics project utilizing insights from Aadhar, resulting in a dashboard that includes the number of accepted, rejected, and applied cases in each state, among other metrics

CERTIFICATIONS

- NPTEL Certificate(IOT)
- Infosys Springboard (HTML5)

ACHIEVEMENTS

- WON SECOND PRIZE IN HACK-A-BOT 2024 .
- CODERS CLUB MEMBER & CO-LEAD.
- PARTICIPATED IN SMARTINDIA-HACK-A-THON 2023.
- PARTICIPATED IN CATCH 2024 AND WENT TO THE FINALS.
